PROFILE

I am a Software Engineer (Frontend) having 3+ years of experience and have contributed well to handling some projects using React JS, Umii JS, Next JS, and Vue JS frameworks. Experienced using Scrum, Trello, Jira, Notion and Git to support work management. I described myself as a creative, willing to learn, and care about healthy lifestyle. As a front-end developer I'm very interested in topics about web application development and UI/UX design. I also like to follow the IT community and like to collaborate, adapt, discuss with people who are experienced in the IT field.
